Profile

I am a recent Graduate Software Engineer at the University of Auckland, actively seeking employment opportunities to enhance my skill set and gain valuable experience within a team-oriented environment.

Experience

Software Engineering Intern, Vista Group (NZ) Limited Summer of 2024-2025

Skills: React Native, React, YAML, TypeScript, C#, Agile, Scrum

- Worked in a Scrum Agile team with 2-week sprints, participating in sprint planning, daily standups, reviews, and retrospectives
- Maintained cross-platform mobile applications using React Native and web interfaces using React in TypeScript.
- Contributed to the improvement of build pipelines in YAML

Pak'nSave Checkout Operator and Store Assistant, New Zealand 2023

Skills: Customer service, Communication, Numerical skills, Attention to Detail

- Strong attention to detail and excellent organisational skills for accurate and efficient transactions
- Adept at handling cash, processing payments, and resolving customer inquiries with professionalism
- Demonstrated ability to work collaboratively in a team
- Delivering exceptional service in fast-paced retail environments
- Expertise in organizing merchandise and ensuring product availability

Projects

Gamehub 2025

Skills: MERN(MongoDB, Express, React, Node), Javascript, Phaser

- Integrated Phaser.js for game rendering and complex game mechanics
- Implemented real-time communication using Socket.IO for low-latency multiplayer

Capstone Project 2025

Skills: React, ASP.NET, Typescript, SQLite

- Built a client-server web application to manage competitions, teams, and events for EVolocity
- Implemented a responsive UI with Tailwind CSS, supporting interactive competitions.

Education

University of Auckland, Bachelor of Engineering (Honours) 2022 – 2025

- **GPA:** 8.26/9.0

• **Achievements:**

- First in Course for SOFTENG 281 - Object-Oriented Programming Engineering
- Dean's Honour List in 2022 and 2023

- **Coursework:** Object-Oriented Programming, Database Systems, Data Structures & Algorithms, Computer Graphics & Image Processing, Networks & Security, Artificial Intelligence & Machine Learning, Advanced Agile & Lean Software Development, Software Tools & Techniques

Macleans College 2017-2021

- A in A-Level Physics and Mathematics

Technologies

Languages: TypeScript, JavaScript, Python, C, C#, C++ , Java, R, MATLAB, SQL, HTML, CSS

Technologies: React, React Native, ASP.NET, Node.js, Express, MongoDB, SQLite, Phaser.js, Socket.IO, Tailwind CSS, OpenGL, YAML
